New Approaches to Economic Challenges: A sustainable and inclusive growth agenda

Gabriela Ramos, OECD Chief of Staff and G20 Sherpa

New Approaches to Economic Challenges (NAEC) was born at the OECD in 2012. OECD member countries warmly welcomed and encouraged this comprehensive organisation-wide effort, both to learn from the crisis and to help avoid future crises.

TOP STORIES

**The opportunities and challenges of greener growth: Getting the whole policy package right**
Catherine Mann, Chief Economist, OECD

New compelling evidence from the OECD indicates that the economy and the environment can be improved together. A shift is starting to take place which should make environmental policies politically easier to advance.

**Why markets need governments**
Robert Skidelsky, Emeritus Professor of Political Economy, Warwick University

The recent economic meltdown was at root not a failure of character or competence, but a failure of ideas.

**NEWS BRIEF**

**JOBS:** Across the OECD area, 41.6 million people were unemployed in July, 7.3 million less than in January 2013, but still 7.1 million more than in July 2008, immediately before the crisis. See [http://oe.cd/16l](http://oe.cd/16l)

The recent droughts in Brazil’s Rio de Janeiro and São Paulo states have exposed the need to shift from crisis management to effective risk governance of the country’s water resource. See [http://oe.cd/16j](http://oe.cd/16j)

**NEW APPROACH** needed to deliver on technology’s potential in schools. See [http://oe.cd/16o](http://oe.cd/16o)

**FINANCE** is a key ingredient of modern economies, but too much finance may hamper economic growth and worsen income inequality. See [http://oe.cd/16k](http://oe.cd/16k)

**ECONOMICS FOR ALL:** What if economics were within everyone’s grasp? Cambridge scholar Ha-Joon Chang believes it is. See [http://oe.cd/16f](http://oe.cd/16f)

A pathway to sound economic thinking
Robert A. Johnson, Executive Director, Institute for New Economic Thinking (INET)

Financial market overhang rather than excessive fiscal spending threatens confidence today. And there are sounds investments which can make society healthier.

Productivity’s wave goodbye?
Did you know that the pace of productivity growth is slowing sharply across the OECD area? Moreover, the trend has continued downward since the early 2000s after a brief upward tick in the 1980s and 1990s, which in part reflected the diffusion of new information and communications technologies.

The automotive sector: Steering beyond the crisis
Caroline Klein and Isabell Koske, OECD Economics Department

The car industry has taken a dent since the recession started to bite in 2008, but even before then, new patterns were emerging that would reshape the sector for a long time to come.

For nearly a decade, the OECD has been working to identify societal progress – ways that move us beyond GDP to examine the issues that impact people’s lives. The OECD’s Better Life Index is an interactive tool that invites the public to share their thoughts on what factors contribute to a better life and to compare well-being across different countries on a range of topics such as clean air, education, income and health.

Over five million visitors from around the world have used the Better Life Index and more than 90,000 people have created and shared their personal Better Life Index with the OECD. This feedback has allowed us to identify life satisfaction, education and health as top well-being priorities. What is most important to you?

Create and share your Better Life Index with us at: www.oecdbetterlifeindex.org
